

Introducing the most extensive, engaging & rich-repository of K-12 Digital Content “ContentShaala”

Unlocking the door to excellence, we offer a well-designed & expert-driven digital content library for K-12 “ContentShaala” that is curated as per the latest CBSE curriculum. From interactive lessons and virtual simulations to engaging quizzes and multimedia content, our platform offers a wealth of resources to support learners in their educational journey.

The App-based K-12 Digital Content incorporates:

- **Real time app-based Digital Content**

The app-based learning application, "ContentShaala", covers the entire nursery to class XII syllabus, using conceptual videos and excellent adaptive learning methodologies. Globus ContentShaala App consist of three parts **Learn, Test and Performance**. Once you log in to the app you can learn from videos & practice multiple assessments.

- **Accessibility of digital content in Online/Offline Modes**

One of the greatest advantages of “ContentShaala” is that it can be accessed in both online as well as offline modes. Offline access is an advantage for learners who face network connectivity problems, removing barrier in continuation of accessing content.

- **Available for Android/iOS/Windows Platforms:**

Learners can access content across different platforms for varying usage preferences. One can avail the content in Android/iOS/windows-based devices and to the wide range of interactive digital learning products/solutions like Mobile Phones, Tablets, Interactive Displays, Digital Board, Laptop, and many more to turn the classroom into the most engaging learning environment.

- **High-quality Videos in Bilingual Languages:**

Empowering learners by removing language barriers, we have tried to inculcate two National languages of the country to make children learn, understand, and adopt concepts in their preferable languages (English & Hindi). While watching the video module the learners can change the audio mode in available languages to understand difficult sentences or words.

- **More than 10,000+ Animated Videos:**

Wide ranges of Animated and Anchor Based Videos, Real-life videos, Science Experiments, 10,000+ interactive games and 2 million learning resources mapped for personalized learning are available. More than 10,000+ animated videos allow learners to study from the most interactive learning platform with the maximum achievement for clarity.

- **“Special Learning Zone” for dyslexic students:**

The App incorporates **special learning zone** for Dyslexic students who require special attention in the process of learning adaptability. The well-defined special learning zone will help these students to achieve the maximum with being less troubled. Moreover, a learner can adjust the speed of the available videos according to their needs, allowing them to learn at their own pace.

- **Teachers' tools to track students' "Progress & Performance":**

Globus digital content is embraced with a huge question bank of more than 1 Lakh questions and HOTS (High order thinking skills) in the form of interactive worksheets and quizzes present in the app. Most importantly, teachers can track students' complete usage, progress, and performance. Based on these insights, teachers can improve their teaching technique and student's performance.
